

## INSTALLATION INSTRUCTIONS TAILLIGHT GUARD PART #T2278/T2278-4

### PARTS LIST:

- (1) Driver side taillight guard
- (1) Passenger side taillight guard
- (2) Top bracket clips
- (2) Bottom bracket clips
- (8) #8 x 3/8" screws

### INSTALLING TAILLIGHT GUARDS:

1. Start with the passenger side, open the rear lift gate and remove the screws securing the taillight to the body. Note: do not discard existing screws as they'll be need to re assemble.
2. Carefully unsnap the taillight until it is free from the housing
3. Attach the top bracket clips to the lense and secure the taillight guard by screwing in #8 screw. Leave semi loose. See figure 1 & 2.
4. Attach the bottom bracket clips to the lense.
5. Once the taillight guard is mounted to lense tighten all screws.
6. Snap the taillight assembly back into body, and re attach existing screws.
7. Repeat steps 1 through 6 on the driver side.
